

Updated Health/Illness Guidelines
2022-2023 School Year

Children are not permitted at school with any of the following symptoms....

1. Fever of 100.4 degrees or higher. Your child may not return until they are fever-free for 24 hours without the use of a fever medicine.
2. If your child has a runny nose, congestion/or cough a COVID test needs to be administered. This can be an at-home test. Results (picture if at-home test was administered) will need to be sent/shown before they can return to school.
3. If a member of your household tests positive for COVID and this person is able to mask and quarantine, the student can return to school as long as they remain asymptomatic. If the person who is positive cannot mask and quarantine, then the asymptomatic student will need to have a negative COVID test (at home or other) each morning. A picture of this test will need to be sent to CGP by 8:30am.
4. If a student tests positive for COVID, the individual will need to stay home for 10 days. If the student has no symptoms at day 6 or after and tests negative for COVID they may return to school.
5. Vomiting within 24 hours.
6. Diarrhea- 2 or more watery stools in 24 hours.
7. Undiagnosed rash lasting more than 24 hours.
8. Eye discharge or pink eye. Child can return to school after medical diagnosis to rule out bacterial or viral infection or 24 hours on antibiotic treatment.
9. Fatigue that prevents participation in regular activities.
10. Head Lice-may not return until treatment is effective.

If the COVID guidelines change we will readdress these guidelines.
